SUMMARY

A highly motivated Informatics fresh graduate. Experienced in data management and analytics, ETL processes, and modern web/mobile application development. Proven ability to execute large-scale data migration and build responsive, data-driven web and mobile applications. Eager to leverage technical expertise in software engineering and data analytics to drive impactful solutions in a dynamic professional working environment.

EDUCATION

Telkom University

Aug 2024 – 2026

Bachelor's Degree in Informatics

Bandung, Indonesia

- Latest GPA: 3.71/4.00
- Relevant Coursework: Software Engineering, Data Analytics, Artificial Intelligence, Machine Learning.

Telkom University

Aug 2021 – 2024

Associate Degree in Application Software Engineering

Bandung, Indonesia

- Graduate GPA: 3.87/4.00 (Cumlaude)

WORK EXPERIENCE

RWS

Aug 2026 – Present

Speech AI Evaluation Specialist (Freelance)

Maidenhead, Berkshire (Remote)

- Evaluated and rated AI model responses for accuracy, relevance, and clarity to improve next-generation Indonesian Speech AI systems.
- Conducted structured conversational testing with AI models, providing detailed feedback based on stringent project guidelines to enhance natural language processing capabilities.
- Leveraged linguistic expertise to fine-tune AI voice interactions, directly contributing to the training and optimization of robust ML models.

ARGHA Co.

Dec 2025 – Present

Web Developer Freelance

Depok, Indonesia

- Designed and prototyped a highly responsive and elegant user interface for Aldiora Beauty Clinic using Figma, ensuring a premium brand image.
- Developed the frontend architecture using React JSX and Vite, implementing an integrated WhatsApp-only contact system to streamline client bookings.
- Managed the deployment and hosting infrastructure using Vercel and configured the custom domain via GoDaddy to ensure optimal web performance and accessibility.

Directorate of Information Technology Center (PuTI) of Telkom University

Jul 2024 – Sep 2024

Data Management Freelance

Bandung, Indonesia

- Expanded the database migration scope across 3 major branch campuses, successfully integrating Surabaya and Purwokerto's institutional data into the main Bandung database, managing an estimated 50+ million records.
- Administered new student academic data for the Bandung campus, establishing robust daily reporting workflows to ensure data integrity and operational compliance with supervisor requirements.
- Optimized complex ETL workflows using Pentaho Data Integration (PDI) and DBeaver to support seamless and highly accurate data synchronization for the Telkom University National Campus (TUNC) system.

Directorate of Information Technology Center (PuTI) of Telkom University Jul 2023 – Jul 2024
Data Management Internship **Bandung, Indonesia**

- Successfully executed a large-scale database migration involving over 37.4 million records across 124 tables specifically for the Telkom University Surabaya branch campus.
- Engineered structured ETL workflows using Pentaho Data Integration (PDI) to extract, transform, and load diverse institutional datasets into the central database.
- Performed rigorous database schema inspections and verified complex data relationships to maintain high data integrity during the migration process using DBeaver.

Faculty of Applied Science, Telkom University 2022 – 2024
Course Practicum Assistant **Bandung, Indonesia**

- Facilitated practical learning sessions for 4 technical courses, including Website Programming, Database Systems, Network Structure Installation, and Object-Based Programming.
- Assisted lecturers in preparing, organizing, and delivering course materials to support structured and effective practicum learning.
- Mentored students during hands-on laboratory sessions to strengthen their understanding of programming, database, networking, and object-oriented concepts.
- Maintained a positive learning experience showed by achieving 95% satisfaction based on lecturer and student practicum form evaluation.

ORGANIZATIONAL EXPERIENCES

Member of Google Developer Student Club 2023 – 2024
Google Developer Student Club of Telkom University **Bandung, Indonesia**

- Built a React-based website integrated with Firebase during a mini bootcamp project by applying modern web development practices in a hands-on learning environment.
- Implemented front-end components using React to create an interactive and responsive web application.
- Integrated Firebase services to support backend functionality, data handling, and application deployment.

Member of Start Up Lab Chevalier of Telkom University 2022 – 2023
Chevalier Lab **Bandung, Indonesia**

- Developed innovative business ideas and creative solution concepts by identifying problems and proposing relevant solutions within the selected field.
- Created a Business Model Canvas (BMC) for Stolllet, an investment application integrated with an e- wallet to support various transaction needs.
- Mapped business components including value proposition, customer segments, revenue streams, and key activities to refine the application's business model.
